Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 December 2000.

DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

1. Claims 1-11 and 23 are rejected under USC 101 as the claimed invention is directed to non-statutory subject matter. For a claim to be statutory under 35 USC 101 the following two conditions must be met:

1) In the claim, the practical application of an algorithm or idea results in a useful, concrete, tangible result,

AND

2) The claim provides a limitation in the technological arts that enables a useful, concrete, tangible result.

As to the technology requirement, note MPEP Section IV 2(b). Also note *In re Waldbaum*, 173USPQ 430 (CCPA 1972) which teaches "useful arts" is synonymous with "technological arts". In *Musgrave*, 167USPQ 280 (CCPA 1970), In *re Johnston*, 183USPQ 172 (CCPA 1974), and In *re Toma*, 197USPQ 852 (CCPA 1978), all teach a technological requirement.

The invention in the body of the claim must recite technology. If the invention in the body of the claim is not tied to technological art, environment, or machine, the claim is not statutory. *Ex parte Bowman* 61USPQ2d 1665, 1671 (BD. Pat. App. & Inter. 2001) (Unpublished).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3628

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bukowsky (US 5,934,674 A) (hereinafter Clifton) in view of Tull et al (US 5,946,667 A) (hereinafter Tull).

Clifton discloses (see at least columns 1-6) all the steps, methods, systems, and means described within claims 1-33, including calculating an initial asset value for the portfolio, recalculating asset value based on progressively improving asset valuation data, a computer configured as a server and further configured with a database of asset portfolios and to enable valuation process analytics, at least one client system connected to said server through a network, and server configured to calculate an initial asset value for the portfolio and recalculate asset value based on progressively improving asset valuation data. Claims 2-11, 13-22, and 24-33 are rejected as being dependant upon rejected independent claims 1, 12, and 23. Clifton does not teach a network.

Tull discloses (see at least columns 1-22, but in particular columns 1-8) the use of a computer on a network for calculating and recalculating portfolio asset valuation data based on progressively improving asset valuation data.

Because it would have been commonsense and advantageous and would have provided a more comprehensive and efficient method of valuation of assets it would have been obvious to one skilled in the art at the time of the invention to add the teachings of Tull to those of Clifton, and to have added those of Clifton to Tull for the same reasons.

Art Unit: 3628

Because it has long been common and well known since at least the 1980s, and particularly since the early 1990s, to value securities portfolios over a network using computers and recalculating the value whenever prices changed, it would have been obvious to one skilled in the art at the time of the invention to do so.
